Prof. Mariagrazia Dotoli, Polytechnic of Bari, Italy (email: mariagrazia.dotoli@poliba.it)

**Session description:**

Nowadays, the adoption of robotics in logistics and transportation systems is becoming a key factor to increase companies' competitive advantage. This special session aims at dealing with the problems related to the proper integration and operation of robotic systems in logistics and transportation applications.

The goal is to investigate the current methodologies used to model, simulate, and control robotic systems in this context and the current limits in their adoption.

The topics of interest include, but are not limited to:

- Logistics 4.0
- Automated warehouses
- Intelligent transportation systems
- Simulation and control of robotic systems
- Discrete event systems
